

It's what's done for humanity that counts!

Maryam Ladi Yunusa Foundation

The Mariam Ladi Yunusa Foundation works with North Eastern Nigerian communities which have achieved a good degree of re-settlement from crisis to rehabilitate orphan girls of high school age who have lost parents or guardians due to insurgencies which have ravaged the region. The Foundation runs a cascading Ambassadorship programme where girls in senior secondary school are empowered to take up mentorship and leadership roles as ambassadors who mentor and support vulnerable girls within their communities, thereby building the capacity of the girls they mentor to in-turn, support other girls. Alongside leadership building the Foundation supports the girls with vocational skills such as ICT and Agriculture, to enable the girls to expand their skills towards creating sustainable livelihoods for themselves and their host families.

"It is our goal to restore our girls back to normalcy, rescue them from trauma and support the creation of sustainable livelihoods. This in turn creates hope for a bright future and the restoration of healthy individuals, who can uphold a sense of civic duty as exemplary leaders in their various communities".

Asmau Durnin,
Mariam Ladi Yunusa Foundation.
